Product Information

Secu SinglePID   **P**roduct **I**dentification **D**ecive

Secu SinglePID – Product identification device to avoid cross-fills

The first user programmable SinglePID from Secu-Tech

The Secu-SinglePID can be programmed with the Secu-PIDTest (Version 3.1) directly in the field.

The data format complains the European standards (EN 14116, EN 13616)
The Secu SinglePID is compatible to all common quality safety systems (QSS) on the market.

No power supply required
The Secu SinglePID is supplied via the electrically conductive product and vapor recovery hoses directly from the tank truck.

ATEX-certified for Zone 0
The Secu SinglePID is installed directly on the isolated coupling in the filling shaft or at the loading rack on the depot.

The Secu PIDTest (V3.1) can program the Secu SinglePID

Advantages:

Easy mounting

Compact design

The product code (e.g.95,98,…) can be programmed with the Secu PIDTest directly in the EX-ZONE (on the coupling)
